LADNAN HOSPITAL

Restoring Hope in Healthcare

LADNAN HOSPITAL

PANGANI, NAIROBI

WHO WE ARE

Ladnan Hospital is a private hospital located in Pangani, Nairobi and has been a beacon of health care since its inception in 2011. Founded by dynamic medical professionals, the hospital's trajectory has seen continuous growth propelling it to a level 4 private hospital. The hospital continues to **bridge the gap in accessible, quality and affordable healthcare.**

In 2017, our visionary founders, in collaboration with a private equity investor, orchestrated a strategic merger with Metropolitan Hospital under The Metro Group PLC (TMG PLC). Following the maturation of the equity fund, Ladnan is now predominantly owned by Kenyan shareholders.

The year 2023 marked a significant milestone as TMG PLC fully acquired Ladnan Hospital, Pangani, aligning seamlessly with The Metro Group's mission of investing in quality, sustainable healthcare to support community development. As a Level 4 facility, Ladnan diligently serves the community and now proudly operates as a TMG PLC subsidiary. It has grown into a trusted medical center in the heart of Nairobi, Pangani, serving thousands of patients annually. The hospital features modern facilities, including an accident and emergency unit, two fully equipped operating theatres, an ICU, a HDU, a laboratory, pharmacy, radiology services, a renal unit, a chemotherapy laboratory, and ambulance evacuation services. It is known for its community-focused approach, efficient and affordable care, and a team of expert medical personnel, including a wide panel of specialists.

Thanks to the efficiency of its processes, Ladnan Hospital, Pangani was recognized for having the **BEST HMIS in the Nairobi County Health Awards 2025**.

 VISION

To provide quality and affordable medical care

 MISSION

To continuously upgrade the facility so as to provide quality and affordable medical care

 CORE VALUES

- » Empathy
- » Compassion
- » Integrity
- » Excellence
- » Quality care

Our Values

- » **Empathy:** We listen and connect with every patient's journey to provide personal, understanding care.
- » **Compassion:** We are driven by a deep desire to alleviate suffering and restore hope in healthcare.

- » **Integrity:** We act with total honesty and professional ethics in everything we think, say, and do.
- » **Excellence:** We perform every task with sincerity and use continuous innovation to lead in specialized medical care.

- » **Quality Care:** We provide reliable, high-quality medical services that are both accessible and affordable for our community.
