ICU / HDU (24 HR)

Our Critical Care Center provides 24-hour monitoring for patients requiring intensive support. Manned by a multidisciplinary team of doctors including specialists and nurses certified in Advanced Cardiac Life Support (ACLS), we collaborate with other medical personnel to maximize each patient's rehabilitation potential. The unit is well-equipped, including on-site blood gas analysis, to provide real-time data for life-saving interventions.

Vaccination and Family Planning Services Available

Accident & Emergency(24hr)

Our A&E department is staffed by experienced team of medical and paramedical professionals. Specially trained in emergency protocols, they provide swift, quality care to handle all medical crises efficiently.

Pharmacy(24 Hr)

Whether you are a patient in our wards or visiting from outside, our pharmaceutical team is here to help. We offer a wide range of keenly selected original and generic medications, vaccines and surgical products. We provide expertise and efficient service for every prescription.

Inpatient (24hr)

At the heart of our service is a commitment to excellence and the vital relationship between our medical team and our patients. We have various Wards from General Ward to ICU/HDU units.

Our wards are staffed by a team of doctors, nurses, and therapists who:

- 🕒 Offer continuous assessment and medical management.
- 🏥 Coordinate your hospital care including diagnostic imaging, lab tests and procedures.
- 👨‍⚕️ Arrange specialty care including therapy or consultation with other specialists.
- 🏠 Plan your discharge to ensure a smooth return to outpatient care or rehabilitation

Radiology & Imaging

Our department provides quality diagnostic imaging including X-ray services and Ultrasound to ensure accurate results and informed treatment plans.

Chemotherapy

Chemotherapy (Chemo) is a treatment that uses powerful drugs to destroy fast-growing cancer cells. Often, two or more drugs are used together for better results. Most treatments are done on an outpatient basis, meaning you can go home the same day. While sessions typically last a half-hour to eight hours, some intensive treatments may require a hospital stay.

Theatre

We have two well-established and fully equipped theatres for all emergencies and elective surgical procedures with a dedicated Post-Operative Recovery Unit.

Some of the surgeries that the hospital can handle include:

- 👨‍⚕️ General & Laparoscopic (Keyhole) Surgery
- 👨‍⚕️ Orthopaedic & Neurosurgery
- 👨‍⚕️ Obstetrics & Gynaecology
- 👨‍⚕️ Urology & Nephrology
- 👨‍⚕️ ENT & Maxillofacial Surgery
- 👨‍⚕️ Cardiothoracic, Vascular & Plastic Surgery
- 👨‍⚕️ Paediatric & Reconstructive Surgery
- 👨‍⚕️ Ophthalmology (Eye Surgery)

Dialysis Unit (24hr)

Our dialysis unit is a spacious and well-equipped facility prepared to handle the needs of both inpatients and outpatients. With the capacity to treat five patients simultaneously, the unit is managed by a team of well-trained renal nurses and dedicated consultant nephrologists. We also provide emergency dialysis services.

Laboratory (24hr)

Our hospital operates a fully-fledged laboratory, providing convenient access to both outpatients requiring routine follow-up or diagnostic services and our inpatients. We offer a comprehensive range of quality laboratory services, utilizing modern equipment to ensure accurate and timely diagnoses.

Ambulance Services (24/7)

Our ambulance operates 24/7 for critical emergencies, hospital transfers and disaster evacuations. It is manned by experienced and specially trained paramedics in Basic Life Support / Advanced Cardiac Life Support.

Maternity & Newborn Services

Your pregnancy is one of the most exciting times of your life with the support of an expert team. We have experienced doctors, midwives and support staff who ensure your time with us is reassuring.

- 🏥 Antenatal Care Clinic
- 🏥 Pre-natal and postpartum care and education.
- 🏥 Maternal and Child Health Clinic
- 🏥 Paediatrician clinic

Appointments are made via our main line.

Maternity Tours
